

Hayes/Beck APA Citations

Creating Citations
Ms. Gann

Why Create Citations

- Avoid plagiarism by citing sources that were used
- Be a responsible scholar and give credit to other researchers
- Let your reader track the sources that were used
- Gives authority to your presentation

How do we begin

- It is an author date format
- First find the author of the resource
- Then the date it was published
- Then the name of resource
- Source address or url if from the web
- Usually can find information at the source or find an example and mimic it

Author's Name

- The author or creator's name is the first part of a proper citation
- Last name , then first and middle initials
- Example:

Smith, J.M.

If the name of an author cannot be found, begin with **title of the article**.f t

CHOOSE
AUTHOR

Date

- The date the article was *written or created* is listed next.

- Examples:

(2021).

(2021, January).

(2021, January 1).

- If you can't find a date use (n.d.).

Title of Article

TITLE NEXT!

- List the title as it appears at the beginning of the article.
- If an author can't be found, the title comes BEFORE the date.
- Examples of Article titles:

Brazil

Polar Bears

Travel in Canada

Name of Source

- A website
 - An online encyclopedia
 - A database
-
- These are three you can choose from:

Discovery Education

World Book Online

Country Reports

SOURCE NAME

Web Address (URL)

URL

- This is included when citing online sources.
- Copy the web address from the web site and paste it into your citation.
- A web address alone is not a proper citation!
- Can use a citation generator if you want

Review...

- Only sources used should be included in References.
- References are arranged in alphabetical order by the first word in citation.
- A web address or a URL on its own IS NOT a proper citation.
